TEMPERATURE MONITORING SOLUTION

NB-IoT Solution provides :

Please scan for more information

- Detecting HIGH Temperature
- Connect Sensor Data to Cloud Platform
- Disconnecting Power Supply when Exceeding the Control Point
- Alert Notification via SMS, Auto-Dialer, Smart Phone APP and Email

TEMP SENSOR   🔥   **HIGH TEMP**

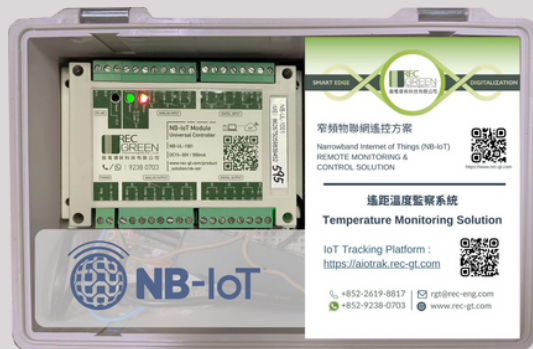

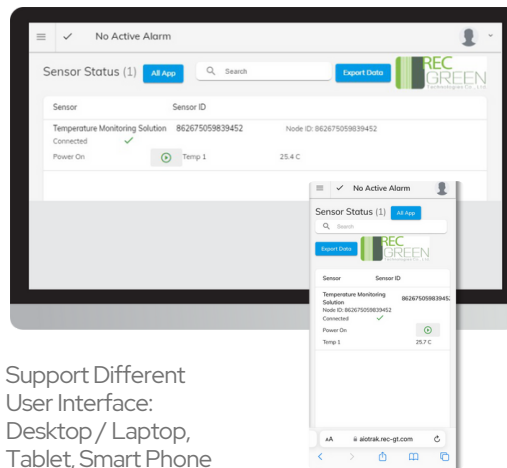

NB-IOT CONTROLLER

TEMP SENSOR

Digital Input 4-20mA input

IoT Tracking Platform

Support Different User Interface: Desktop / Laptop, Tablet, Smart Phone
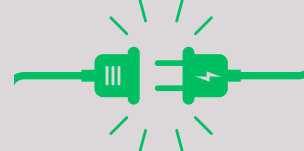

Alert Notification

- SMS **SMS**
- Auto-Dialer
- Phone APP
- Email

CUT Power Supply

MAIN FEATURES :

Feature	
Temperature Monitoring	✔
Temperature Alarm (HIGH / LOW / CUSTOMIZED)	✔
Real Time Alarm & Notification On Cloud Platform	✔
Support Notifications via SMS, Auto-Dialer, Smart Phone APP and Email	✔
Cut the Power by Pressing a Button on the Cloud Platform	✔
Installed with UPS when the Power Cut-Off (Optional)	✔
Expandable Digital or Analog Input & Output, UART I/O	✔
Built-In Antenna (Default) / External Antenna (Optional)	✔
Functional User Dashboard with Graphical Data History, I/O Status, Blinking / Sound Notification	✔
Support Universal 003 and Temp3-2 Firmware Versions	✔
Small Product Dimension (145L x 90W x 40H mm) for Flexible Installation	✔
